

How to access NoodleTools through Google Apps

Applewild students access NoodleTools through Google Apps using your school Google ID (first initial+last name@applewild.org). You can register as a new user or access an existing NoodleTools folder without the need to authenticate into the subscription or to remember a separate personal username and password.

Accessing the installed app

Log in to NoodleTools through the button found within the Google Apps Universal Navigation Bar as pictured. Note that the app button does not appear in the menu found under the Google home page (at www.google.com). You need to be in another Google App, like Mail or Drive.

Alternatively, you can open NoodleTools from this customized link:
<http://www.noodletools.com/logon/gapps/landing/applewild.org>

Note: If you are using an iPad or other mobile device, you will use this customized link to access NoodleTools since the app menu on those devices will not display the NoodleTools app.

Logging in to NoodleTools

Clicking on the NoodleTools app in the Universal Navigation Bar or navigating to the customized login page URL in a browser initiates the login process. You will be prompted to select your Google Apps account. If this is not your first time logging in this way, you will be automatically logged in and see your Projects screen.

If this is the first time you have logged in through Google Apps, an intermediate screen gives you an opportunity to either create a new account or to link an existing account to this Google Apps login.

A screenshot of a login screen titled "Link an existing NoodleTools account to your Google Apps login?". It explains that this is the first time logging in with a Google Apps account and offers two options: 1. "Already used NoodleTools under this school's subscription and need access to those projects? Choose 'I have an existing NoodleTools account' and enter the ID and password for the account. We'll update it for access through Google Apps." 2. "If you haven't used NoodleTools before, just select 'Create a new account' and we'll get you started with a brand new account." The "I have an existing NoodleTools account" option is selected. Below it, there are fields for "Subscription:" (set to "School (Testing)"), "Personal ID:" (empty), and "Password:" (empty). There is also a "Create a new account" option and a "Submit" button.

Linking to a previously-created account

The intermediate screen comes up the first time you log in through Google Apps, and gives you an option to link to a preexisting account.

If you wish to do so, enter the ID and password associated with your existing account and click **Submit**. Your Google account will now be associated with that existing NoodleTools account, and you will see your projects when you log in.

A screenshot of an "Edit Profile" screen. It allows users to update their personal profile. Fields include: Personal ID (darnon), Initials (DA), Phone (9951), School / Location (School 1), and Graduation Year (2015). There is a "Help Setting" dropdown set to "On". Below these fields is a section for "Display 'Show Me' screen for these citation types (if available):" with a list of citation types and checkboxes. The "All" checkbox is selected. At the bottom, there is a "Save Profile" button and a link: "Click here if you would like to connect your Google Apps login to a different NoodleTools account."

Creating a new account

Alternatively, if you are new to NoodleTools or no longer need your old work, you can choose the Create a new account option on the screen. This will generate a new (empty) NoodleTools account in the system.

Unlinking a NoodleTools account from a Google ID

If you go through the screen to link an existing account or create a new account, and then realize you've made an error, you can unlink the account from your Google ID to start over. For example, you might have linked to the wrong ID/password (sometimes students have made multiple accounts), or you may have created a new account when you meant to link to an existing one.

To correct this, click My Account in the upper right on your NoodleTools screen to edit your user profile, then click "Click here if you would like to connect your Google Apps login to a different NoodleTools account" option at the bottom of that screen.

Clicking the link signs you out and disconnects your Google Apps login from the account. The next time you click on the NoodleTools app, you will see the intermediate screen again, allowing you to link to an existing account or create a new account.
